Dear friderike when you get this letter
I shall feel much better than before. You have
been me in Ossining and after a good and
quiet time my depression became much more
acute — I suffered so much that I could not
concentrate any more. And then, the security
— the only one we had — that this war will
take years, that it would take ages before we
in our special position could settle again in
our home ~~was~~ too depressing. I liked Petropolis
